-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit 1711

All remaining rejections and/or objections follow.

Applicants' Abstract is objected to since the substituents in the Abstract are undefined. Correction is required.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. § 103(a) as being unpatentable over Dubroeucq et al. (USP 4,711,890).

Dubroeucq discloses a quinoline compound embracing those of applicants. Note the structure at column 1 line 17 - column 2 line 52 and that the numerous Examples in the patent produce compounds in which A and E of the structure are equal to carbon.

Note also that patentees' groups "R₁" and "R₂" may be the moiety at column 1 line 40 attached to phenyl or cycloalkyl etc. There are no examples of applicants' specific compounds although of course as set out above, the generic structure disclosed by patentees embrace those compounds of applicants.

It would have been obvious to a practitioner having ordinary

Art Unit 1711

skill in the art at the time of the invention to select applicants' moieties from those of the patent to arrive at the compounds of the claims based on patentees' disclosure and in the expectation of adequate results absent any showing of surprising or unexpected results.

It is noted that patentees in the Petition of 9-22-99 of parent case Serial No. 08/450,437 admitted that even broader

claims were unpatentable over Dubroeuq, U.S. Patent 4,711,890.

The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman*, 29 USPQ 2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 12 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-54 of U.S. Patent No. 6,608,083. Although the conflicting claims are not identical, they are not patentably distinct from each other because choice of one particular species

Art Unit 1711

over another would have been obvious to a practitioner having ordinary skill in the art at the time of the invention in the expectation of adequate results absent any showing of surprising or unexpected results.

With regard to applicants' arguments, no arguments were presented with regard to any objections or rejections which have been maintained.

This Office action is not being made FINAL.
